

# **Musical Surroundings Linear Power Supply**

24v power supply for use with Phenomena 2+, Nova II, Nova III, and SuperNova III units

## **For use as a power supply upgrade for Phenomena 2+, Nova II, or Nova III:**

Connect one side of the power link cable to the linear power supply unit and connect the other end to the power supply input jack on the back of your Phenomena 2+ or Nova II. Then connect the IEC power supply cable to the back of the linear power supply and to your AC mains. Turn on the switch on the back of the linear power supply unit and your phono stage will light up and is ready to use.

## **For use with SuperNova III:**

Use the locking umbilical power cable to connect the Super Nova III to the large multi-pin connector on the back of the linear power supply, then connect the IEC cable to the back of the linear power supply and to your AC mains. Turn on the switch on the back of the linear power supply unit and your phono stage will light up and is ready to use. Consult the SuperNova III manual for further information.
